

HAVIT

HF610 HIGH SPEED HANDHELD FAN USER MANUAL

High Speed Handheld Fan

Instructions

1.Fan Operation:

Press the power button once to start the fan and cycle through speeds 1 to 5, with the current speed displayed on the screen. After 3 seconds of inactivity, the display will revert to showing the battery level. Press again to turn off the fan; the display will turn off.

Long press for 2 seconds at any speed to turn off.

2.Charging Indicator:

While charging, the digital screen flashes to indicate the battery level. When fully charged, it displays "100%" and remains on.

Product Parameters

Input	5V $\overline{\text{---}}$ 2A
Power	5W
Product Size	119*55*35MM
Product Weight	128g

Notice

1. This product uses USB 5V voltage supply, please do not use too high or too low voltage charger for charging.
2. When turning on the power switch and working on the motor, do not insert your fingers into the fan's protective net. The fan is damaged and may cause injury to your body.
3. Do not stop the fan blades with hard objects, otherwise the control circuit or fan motor will be burned out due to excessive current.
4. When the product has not been used for more than 3 months, please charge the product to 75% capacity for storage.
5. Children under ten years old should use under the guidance of adults.
