Section 4. First-aid Measures

4.1 Description of first aid measures

- General advice : Move out of dangerous area.
Never give anything by mouth to an unconscious person.
- Skin contact : May cause burn in case of contact with product at high temperature.
Remove contaminated clothing and footwear and dispose of safely.
Wash affected area thoroughly with soap and water.
Seek medical attention if skin irritation, swelling or redness develops and persists.
- For minor thermal burns : Cool the burn.
Hold the burned area under cold running water for at least five minutes, until the pain subsides. However, body hypothermia must be avoided.
Do not put ice on the burn; Remove non-sticking garments carefully. Do not attempt to remove portions of clothing glued to burnt skin but cut round them. Seek medical attention in all cases of serious burns.
- Eye contact : Symptoms: slight irritation (unspecific). May cause burn in case of contact with product at high temperature.
Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing.
If irritation, blurred vision or swelling occurs and persists, obtain medical advice from a specialist.
If hot product is splashed into the eye, it should be cooled immediately to dissipate heat, under cold running water.
Immediately obtain specialist medical assessment and treatment for the casualty.
- Inhalation : At ambient temperature inhalation is unlikely because of the low vapour pressure of the substance.
Symptoms: None expected at ambient temperature. Inhalation of fumes or oil mists produced at high temperatures may cause irritation of the respiratory tract.
In case of symptoms arising from inhalation of fumes or mists or vapours: Remove casualty to a quiet and well ventilated place if safe to do so.
If casualty is unconscious and
- Not breathing – ensure that there is no obstruction to breathing and give artificial respiration by trained personnel. If necessary, give external cardiac massage and obtain medical assistance.
- Breathing – place in the recovery position. Administer oxygen if necessary.

Obtain medical assistance if breathing remains difficult.

Ingestion : Symptoms: few or no symptoms expected. If any, nausea and diarrhoea might occur.
Do not induce vomiting. Ask for medical assistance.
Do not give anything by mouth to an unconscious person.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms : No data available

4.3 Indication of any immediate medical attention and special treatment needed

Information to physician : No data available

Section 5. Fire Fighting Measures

5.1 Extinguishing media:

Suitable extinguishing media : Dry powder, foam, carbon dioxide, sand and clay.

Unsuitable Extinguishing Media : Do not use direct water jets on the burning product; they could cause splattering and spread the fire.
Simultaneous use of foam and water on the same surface is to be avoided as water destroys the foam.
Incomplete combustion is likely to give rise to a complex mixture of airborne solid and liquid particulates and gases, including carbon monoxide and unidentified organic and inorganic compounds.

5.2 Special hazards arising from the substance or mixture

Hazardous combustion products : Will cause combustion with high temperature, fire or oxidizing agent.

5.3 Advice for firefighters

In case of a large fire or in confined or poorly ventilated spaces wear full fire resistant protective clothing and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

6.1.1 For non-emergency personnel

Protective equipment : Keep non-involved personnel away from the area of spillage.

Emergency procedures : Alert emergency personnel. Except in case of small spillages, the feasibility of any actions should always be assessed and advised, if possible, by a trained, competent person in charge of managing the emergency. It is recommended to eliminate all ignition sources if safe to do so (e.g. electricity, sparks, fires, flares). If required, notify relevant authorities according to applicable regulations.

6.1.2 For emergency responders

Fully protective measures are necessary.
